

## Cobalt Safety Consulting Inc.

Cobalt Safety Consulting is led by former Ministry of Labour Inspector Kevin Brown. Founded in 2013 Kevin was tired of always seeing safety fail. With improper safety information being provided to employers, by Government agencies, safety professionals and other consultants it was time to change the game.

*"Everyone needs the right information and workers and employers all need to know how to protect themselves"*

*Ask for SAL as your trainer.*

*"Great Info, Sal was an entertaining, informative and knowledgeable instructor. I highly recommend both this course and trainer"*

*"Sal may have just saved my life one day!"*

*"Sal was hands down the most informative working at heights trainer I have come across in my experience"*

*"Sal Informed us with the answers to all of our questions we asked, he exceed all expectations. I would recommend this course to anyone looking to be properly trained. He even spoke Spanish to a few of the guys to help clarify their questions Cool!"*

*"Great course! Great Instructor!"*

*"I been doing this for years and thought just another course. However this course was better than any I've taken and I must say even this old dog learned some new tricks!"*

*"Es muy bueno que tenemos un instructor que habla Español!"*

## Your staff deserve the best.

At Cobalt Safety Consulting Inc. we want to bring you the best training possible. Therefore, all of our trainers have undergone an intensive 12 week Instructor Trainer program with a minimum 90 hours of **real supervised classroom trainer exposure** before being certified to teach Cobalt Safety's government approved Working at Heights Training Program. We invest in our trainers, so that you get the best from your investment in your workers.

Section 25(2)(h) of the OHSA – it would be a reasonable precaution to train your workers to a government approved standard, using the best working at heights trainers.

**Training provided, as if your life depends on it!**
